SOLIDARITÉS INTERNATIONAL is a humanitarian organisation that works to provide assistance and support to the most vulnerable people affected by a humanitarian crisis. The quality of humanitarian action for SOLIDARITÉS INTERNATIONAL depends on its ability to respond to the needs of affected populations and its capacity to adapt to local contexts and respect and promote the dignity of the people, women and children on whom it operates, through SOLIDARITÉS INTERNATIONAL interventions. The Logic of Intervention defines the organisation’s identity. This Logic of Intervention is a programmatic principle that concerns all the organisation’s ongoing and future humanitarian action and reflects the values that define the organisation’s identity. The Logic of Intervention sets out the organisation’s identity and the key principles that underpin its humanitarian interventions. SOLIDARITÉS INTERNATIONAL’s Strategy for Sustainable Responses is guided by three interrelated principles: (1) our involvement is based on an understanding of the needs of the populations affected; (2) we seek to understand and address the root causes of crises; and (3) our assistance is provided within an organisational context that maximises humanitarian impact and ensures access and absorption. SOLIDARITÉS INTERNATIONAL follows a participatory approach to understand and address the root causes of crises. SOLIDARITÉS INTERNATIONAL’s Vision for Sustainable Action is based on an understanding of the needs of the populations affected, the root causes of crises, and the organisational context that maximises humanitarian impact and ensures access and absorption. SOLIDARITÉS INTERNATIONAL’s Vision for Sustainable Action is based on the following principles: (1) we intervene in situations where the needs of the populations affected are not being met; (2) we seek to understand and address the root causes of crises; and (3) our assistance is provided within an organisational context that maximises humanitarian impact and ensures access and absorption.
