Don en Confiance
VOTRE DON, NOTRE ENGAGEMENT

OUR ORGANIZATION IS CERTIFIED "DON EN CONFIANCE"

SOLIDARITÉS INTERNATIONAL IS RECOGNIZED BY DON EN CONFIANCE, an organization that monitors French charities and foundations that seek donations from the public. This means that SOLIDARITÉS INTERNATIONAL, like 98 other organizations, is committed to respecting principles of statutory operation and not-for-profit management, financial transparency, rigorous management, and high-quality communication and fundraising activities.

The figures presented are taken from our 2024 accounts, which were certified by the independent statutory auditor ACA Nexia.

OUR IDENTITY

SOLIDARITÉS INTERNATIONAL

SAVING LIVES, CHANGING LIVES

The NGO SOLIDARITÉS INTERNATIONAL assists populations affected by conflicts and violence, epidemics, natural and climate-related disasters, and economic collapse. Our humanitarian teams are committed to helping people whose lives, health and security are under threat, by meeting their most vital needs: food, water and shelter.

SOLIDARITÉS INTERNATIONAL responds to crises by distributing emergency aid in person and by simultaneously implementing long-term solutions that enable affected populations to regain sustainable access to water, sanitation, hygiene, diversified livelihoods and safe housing.

Protection, dignity and autonomy are the ultimate objectives of SOLIDARITÉS INTERNATIONAL's action.

MEETING COMPLEX CHALLENGES IN DIFFICULT CONTEXTS

Thanks to our extensive field experience and expertise, SOLIDARITÉS INTERNATIONAL is able to work in the most difficult-to-access areas and in particularly dangerous contexts.

SOLIDARITÉS INTERNATIONAL also demonstrates unique technical and social engineering capabilities, which are continuously perfected over time, by building on the innovation and development work accomplished by our teams and partners.

SINCE 1980, AND FOR AS LONG AS IT TAKES

SOLIDARITÉS INTERNATIONAL's commitment to assist populations affected by the most severe crises dates back to 1980.

We always provide aid at the request of the affected population or its representatives, cooperate with our local partners and are fiercely determined to constantly uphold the humanitarian principles of humanity, independence, impartiality and neutrality.

Our field teams mainly comprise locally hired staff, to help ensure that the aid provided fits the population's needs as closely as possible.

"The first response to human suffering must be solidarity"

ALAIN BOINET,
FOUNDER OF SOLIDARITÉS INTERNATIONAL

OUR PRESENCE IN THE MOST DIFFICULT CONTEXTS IS A POWERFUL STATEMENT

By Antoine Peigney,
Chairman
of SOLIDARITÉS INTERNATIONAL

and Kevin Goldberg,
CEO
of SOLIDARITÉS INTERNATIONAL

In response to the unprecedented scale and severity of humanitarian crises in 2024, SOLIDARITÉS INTERNATIONAL's teams maintained their commitment to stand by the most vulnerable populations. From Sudan to Gaza, from Kivu to Mayotte, we responded to emergencies, consolidated our aid mechanisms and defended the fundamental right to humanitarian assistance, everywhere.

"*People have lost all their possessions. We had to go from house to house to get food and water. If we went outside, we were shot at. Four of my neighbours, including two children, were killed on their way to fetch water from the pump, early in the morning.*"
This testimony from Aldambari, one of our colleagues in Darfur (East Sudan), reveals the violence that millions of people endure during crises today: terror, grief, abandonment.

In 2024, the crises around the world escalated even further, leaving 325 million women, men and children in need of assistance. We took every action we could to assist them, as we have done since 1980.

Sudan alone has experienced every facet of disaster. Full-scale war, 13 million people displaced, growing famine, whole areas cut off from any form of aid. When war broke out in 2023, our teams were mobilized within hours. They maintained their action throughout 2024, along the Chad-Sudan border, in South Sudan, in the Central African Republic, as well as in the heart of Sudan, despite extreme insecurity.

In the Democratic Republic of Congo, fighting in the Kivu region has forced hundreds of thousands of people to flee. Our NGO improved access to water in areas that are overcrowded with displaced people, where epidemics are a constant threat.

Words cannot describe the situation in Gaza. As each month goes by, this coastal strip has been reduced to rubble. Following the offensive at the end of 2023, the country saw its remaining essential services collapse during 2024. Deprived of water, electricity and any source of income, the Gazan population survives in the shadows, fearing bombardment. Here too, despite the risks, we took action - to provide water, hygiene and a minimum level of human dignity. The crisis spread to the region: in southern Lebanon, airstrikes triggered massive population movements in this already shattered country. Our NGO expanded its intervention area to respond to this emergency.

It is not possible to mention here each of the 26 countries where we provided assistance for the most vulnerable populations. But we know that the vast majority of the people we support were forced into displacement. So in 2024, we decided to deliver a powerful message about their plight. Our annual communication campaign reminded the public that "*leaving your life behind is not a choice*": every time someone has to flee, it means they have suffered violence, are in immediate danger and place their future in jeopardy. This message underlined the urgent need to rapidly provide sufficient aid to meet growing needs and maintain dignity, as the number of people that are forcibly displaced continues to increase worldwide.

SOLIDARITÉS INTERNATIONAL is also active in France. In Mayotte, where we have been working since 2022 to improve access to water for millions of people caught between structural poverty, migratory tension and the denial of basic human rights, Cyclone Chido suddenly ripped across the island in December 2024, destroying thousands of makeshift dwellings. Our teams are striving to respond to the crisis.

2024 was also a year of innovation. We continued to deploy the HAACT project, which increases our ability to analyse contexts where humanitarian access is extremely limited, in particular using satellite images. Piloted for several years in the Sahel, this methodology is now being used in other regions.

The HAACT project is part of our 2022-2025 strategy, which we continue to diligently implement. This strategy focuses on the quality of our programmes, our capacity to take action quickly and our responsibility to communities. It is built on the commitment of our teams, on rigorous processes and on our shared determination, with our partners, to meet the needs expressed by the populations we assist as closely as possible.

In a world where humanitarian relief is increasingly obstructed – by war, political decisions or distrust – our presence in the most difficult contexts is a powerful statement. With one essential condition: our independence. We therefore defend our ability to take action freely, with the sole purpose of serving the interests of the populations we assist.

We face many challenges, which are further compounded by major cuts in humanitarian funding. But this does not deter us from continuing to do what we do best: being there when everything falls apart. Making sure that people who have lost everything are not alone.

THE MIDDLE EAST UNDER BOMBARDMENT

Tensions in the Middle East have escalated since the October 7 attacks and the devastating Israeli offensive on Gaza, triggering a major new humanitarian crisis. Living conditions for civilian populations severely deteriorated across the region in 2024, in every country where we are working. Intense military operations - especially airstrikes - together with violations of international humanitarian law, destroyed essential infrastructure, demolished people's livelihoods and resulted in large-scale population displacement.

Our teams have been working in Gaza since early 2024. Initially, we distributed food kits, then we operated desalination plants and other facilities to provide and distribute drinking water to tens of thousands of Gazans every day.

Lebanon came under heavy bombing from September to November 2024. Our NGO's long-standing presence there (since 2013) enabled us to react very quickly and distribute water, food and essential items in collective shelters.

Yemen is suffering from the most severe cholera epidemic in the world. The country remains in acute humanitarian crisis, which presents complex challenges. We have been working there since 2017, providing emergency relief to displaced people, strengthening community resilience and consolidating local systems.

Finally, the collapse of the Assad regime in Syria, after 14 years of war and terror, means that this totally devastated country can now at last envisage reconstruction. Most of the 14 million Syrian refugees and displaced people want to return home, but everything is in ruins. SOLIDARITÉS INTERNATIONAL is committed to providing them with basic services (water, shelter, livelihoods).

SUPPORT FOR POPULATIONS IN NEED

Through SOLIDARITÉS INTERNATIONAL's action in 2024:

4,382,835 PEOPLE
RECEIVED ASSISTANCE, with respect for their culture and dignity, on the basis of their vital needs.

The emergency aid provided by SOLIDARITÉS INTERNATIONAL enabled:

762,857 people
to access a sufficient quantity of **drinking water**

447,472 people
to access adequate **sanitation facilities**

829,112 people
to meet their basic **food needs**

83,725 people
to benefit from safe essential **infrastructure** (shelters, schools, markets, bridges, etc.)

519,210 people
to benefit from **preventive measures to fight waterborne diseases and epidemics**

In addition, our organisation also enabled:

943,855 people
to gain **long-term access to water, sanitation and hygiene services**

52,881 people
to access **long-term economic opportunities**

SUSTAINABLE DEVELOPMENT GOALS

In 2015, 193 countries adopted 17 Sustainable Development Goals (SDGs) at a UN summit, forming the 2030 Agenda to "end poverty, protect the planet and ensure that all human beings can enjoy prosperous lives". Through its activities, SOLIDARITÉS INTERNATIONAL has contributed to the SDGs by assisting:

1,605,377 people for SDG 1

"End poverty in all its forms everywhere"

1,758,483 people for SDG 2

"End hunger, achieve food security and improved nutrition, and promote sustainable agriculture"

612,615 people for SDG 3

"Ensure healthy lives and promote well-being for all at all ages"

2,484,341 people for SDG 6

"Ensure availability and sustainable management of water and sanitation for all"

In order to obtain the most precise figures possible, SOLIDARITÉS INTERNATIONAL only counted people that directly benefited from programs implemented by our teams. We did not include people that benefited indirectly from programs implemented in affected communities, or people that benefited from projects carried out by our partner organizations within the humanitarian consortia in which we participated. People that benefited from several activities, funded by one or more donor contracts, were clearly identified and counted only once.

SOLIDARITÉS INTERNATIONAL's contribution to achieving the Sustainable Development Goals (SDGs) that fall within its mandate was calculated by identifying all the people assisted within each sector of activity during the recovery and adaptation phases of programs, excluding immediate emergency responses to shocks. SDG 3 represents projects from the "Water, Sanitation and Hygiene" sector that include a "Health" or "Nutrition" approach. Our field teams and our Deputy Direction of Operations for Programs department worked on these calculations together, to make sure that the figures reported were as precise and transparent as possible.

2024, AN OPERATIONAL TURNING POINT

2024 was a pivotal year for our operations. It was a year of many humanitarian crises, and SOLIDARITÉS INTERNATIONAL also experienced radical changes to several aspects of our work. Across the world, massive numbers of people were internally displaced in 2024, many more than in 2023. Internally displaced people are often less well protected by law than refugees who cross the border into another country. They find themselves with no accommodation, no source of income, no supplies, and, in most cases, far from home. In keeping with our mandate, SOLIDARITÉS INTERNATIONAL works hard to support these displaced people, provide them with assistance and help them rebuild their lives.

FAILURE TO PROTECT AID WORKERS, A VIOLATION OF HUMANITARIAN PRINCIPLES

2024 also marked a turning point in the protection - or rather the lack of protection - for humanitarian workers. First in line by far are our colleagues, the national staff of national or international NGOs, who work most closely with affected populations. They paid a very high price in this year's high-intensity conflicts with their sophisticated weapons, which took many civilian lives. The issue here is not just security for humanitarian workers, but security for all civilians. Deliberately targeting or not protecting civilians is against international humanitarian law as defined in the Geneva Conventions and their annexes. The all-out wars waged by armed groups or States, which we watch from a distance via the media, are the harsh reality that our teams see and experience every day.

The wars in Gaza and Sudan will go down in history for their blatant violations of international humanitarian law, and for the countless victims of hostilities right in the middle of the homes and lives of men, women and children. Humanitarian workers also face the same risks and fall victim to airstrikes, stray bullets and atrocities. This is not right. Working and providing assistance in conflict zones undeniably entails certain risks. But aid workers are protected by humanitarian law and its principles. The warring parties, whoever they may be, are obliged to protect them. This is not optional. In 2024, this obligation was violated too many times.

ADAPTING OUR SECURITY PROTOCOLS TO EACH CONTEXT

Applying strict protocols to manage security is a priority for SOLIDARITÉS INTERNATIONAL. They cannot prevent all security incidents, but they do allow us to reduce the likelihood and impact of such events. The risks in Ukraine, such as exposure to airstrikes or drone attacks, are of course very different from the risks in Burkina Faso or northern Mozambique, where radical armed groups are operating. We therefore adapt our risk mitigation measures to the actual situation at each location. In 2024, our organization once again had to manage several security incidents affecting our teams, our offices, our equipment and, by extension, our projects. Security is and will remain our priority. This annual report, which presents an overview of all our activities, also gives us the opportunity to thank everyone who works with and for SOLIDARITÉS INTERNATIONAL to ensure that assistance reaches those most in need.

FOOD SECURITY, WATER, HEALTH: ENHANCING OUR METHODS AND EXPERTISE

2024 was also a pivotal year for our programmes. This year, a larger proportion of our activities focused on food security. These programmes took various forms, ranging from basic assistance to agroecology initiatives to strengthen economic and environmental resilience among populations in rural areas affected by armed conflict or natural disaster. SOLIDARITÉS INTERNATIONAL also developed its expertise by integrating water resource management into our operational procedures. This essential know-how enables us to plan and adapt our projects to local ecosystems and water use, including during emergency interventions.
Lastly, our NGO's relentless, decades-long battle against cholera in the field, in countries such as Yemen or Nigeria, has resulted in new innovations and the publication of a manual.

A YEAR OF CONSOLIDATION

Following the substantial increase in SOLIDARITÉS INTERNATIONAL's volume of activity in 2023, 2024 was a year of stabilization. Is the world more stable? Are there fewer large-scale humanitarian crises? Have long-standing crises been resolved? Of course not. 2024 was a year of stabilization to enable our organization to consolidate the substantial growth in 2023, and also due to the downward trend in public funding for humanitarian assistance, a sign of more radical changes to come in 2025.

A YEAR OF CRISIS IN GAZA

2024 was a year of unprecedented violence in Gaza, which severely affected the whole enclave, causing basic services - health, water, electricity, education - to collapse, and resulting in shortages of essential goods, food and basic necessities.

Repeated attacks forced civilians to flee; some people were displaced more than ten times. First, civilians were displaced to southern Gaza, mainly congregating in the Rafah Governorate, where there were 1.7 million displaced Palestinians in April 2024. In May 2024, an offensive against Rafah triggered another massive displacement of over 1 million people to the central part of the Gaza Strip, and especially to Deir El Balah, where SOLIDARITÉS INTERNATIONAL is working. During the last quarter of 2024, another major offensive targeted northern Gaza. By this time, essential supplies were dwindling due to the blockade on the enclave and winter had arrived, bringing cold weather and rain. Displaced people were living in schools, organized camps, informal sites, or even in ruined towns, where it is more difficult to coordinate and provide assistance. According to the United Nations, by the end of November 2024, over 43,000 Palestinians had been killed in the war, and more than 104,000 injured.

OUR EMERGENCY ACTION

SOLIDARITÉS INTERNATIONAL has been working in Gaza since February 2024. During the year, our team (5 international staff and 22 Palestinians) carried out operations from our Deir El Balah base, in the centre of the Gaza Strip, with programmes covering the Rafah, Khan Younès, Deir El Balah and Gaza Governorates.

Most of the groundwater in Gaza is saline due to seawater intrusion. In the past, the Strip was therefore dependent on Israel for its water supply. When war broke out after October 7, the entire water supply was very quickly cut off. Access to drinking water fell by 94%. Consequently, we decided to focus our efforts on producing and distributing drinking water.

DELIVERING AID DESPITE RESTRICTIONS

Another consequence of the war was the introduction of even more severe restrictions on imports into Gaza, which ban the importation of a list of equipment and supplies that could be used to produce weapons. It is therefore impossible to import energy production equipment, certain types of pipes, pumps, and other essential components to maintain or rehabilitate water production facilities. To overcome these difficulties, our team rehabilitated water desalination plants using materials that were available locally, all the while working under extreme security conditions. We installed a desalination plant next to Al-Aqsa hospital in Deir El Balah and rehabilitated two other plants so that water production could resume. By the end of 2024, these plants had produced 10 million litres of drinking water.

At the same time, our mobile energy generation units produced 9 million litres of domestic water, by supplying energy for wells that were no longer functioning. Every morning, tanker trucks operated by SOLIDARITÉS INTERNATIONAL and our partners started driving back and forth to deliver water to distribution points.

This vital, large-scale initiative is an essential accomplishment, but 10 million litres of water are just a drop in the ocean compared to the needs of 2 million Gazans living in unsanitary conditions. More than 2,000 families received hygiene kits, while jerricans were distributed to 3,000 families and emergency food rations to 1,000 households.

MAYOTTE CRISIS: REVISITING THE DEVASTATION OF CYCLONE CHIDO

Cyclone Chido ripped through Mayotte on 14 December 2024. With powerful gusts of wind of up to 250 km/hour, the cyclone flattened everything in its path. This devastating weather event exacerbated the already complex humanitarian situation, adding another layer of urgent needs and difficulties. SOLIDARITÉS INTERNATIONAL immediately took action to respond to the crisis. Our NGO has been present in the French archipelago since 2022, where we are working to improve access to water, sanitation and hygiene for people living in makeshift housing.

IMPLEMENTING RISK REDUCTION MEASURES

The day before the cyclone, as the weather warnings became more and more severe, our field teams received instructions to take shelter and prepare for several days of difficult conditions. SOLIDARITÉS INTERNATIONAL also informed the people living in the districts where we work, via community focal points, about the location of emergency community shelters provided by the prefecture.

AFTER THE STORM, MEETING CRITICAL NEEDS

The cyclone turned out to be extremely violent, leaving several dozen people dead or missing and causing considerable damage. Thousands of people were faced with food insecurity and a lack of drinking water. The cyclone damaged electricity and water infrastructure everywhere, which was already insufficient to meet the population's needs before the storm struck. Whole areas were cut off from the rest of the island for several days, blocking any assistance from reaching the people living there, whose shelters had been flattened by the high winds.

In these exceptional circumstances, SOLIDARITÉS INTERNATIONAL quickly mobilized and sent reinforcements of staff and equipment to organize humanitarian assistance, and to support our staff and partners on the island, who had also been affected by the disaster. Our NGO extended its pre-cyclone operations to cover community shelters and two new districts, to help and provide water for as many people as possible.

ENSURING ACCESS TO SAFE DRINKING WATER

To prevent the risk of an epidemic, it was essential to reduce the population's exposure to waterborne diseases. Drawing on their locally acquired expertise, our team carried out various activities with our local partners: distributing hygiene kits and chlorine tablets to purify water; installing and repairing tanks and water points; training community organizations and focal points on water chlorination, how to manage water storage systems, good hygiene practices, etc. These emergency measures reduced the risk of infections due to people consuming or coming into contact with unsafe drinking water.

Cyclone Chido was an ordeal for the population of this fragile archipelago. Six months after the storm, SOLIDARITÉS INTERNATIONAL still has an enlarged team in Mayotte, and we are maintaining our efforts to assist those in greatest difficulty.

SUPPORT FOR UKRAINIANS EXPOSED TO WAR AND WINTER

Two years after Russia invaded Ukraine in February 2022, the country remains in severe crisis: 44% of the Ukrainian population - around 14.6 million people - needed humanitarian assistance in 2024. Incessant, almost daily bombing in frontline regions has damaged vital infrastructure and contaminated drinking water, preventing millions of refugees and displaced people from returning home. To meet these critical needs, SOLIDARITÉS INTERNATIONAL helped populations regain their autonomy by distributing cash and winter equipment, repairing heating systems and insulating housing, as well as reinforcing water supply infrastructure in coordination with local authorities.

DISPLACEMENT CRISIS IN TOGO AND BENIN

In response to the Sahel crisis, SOLIDARITÉS INTERNATIONAL supported displaced people and host communities in North Togo and North Benin during 2024, working in consortium with Handicap International and four local partners. Our NGO distributed emergency kits to 6,615 households and provided 5,414 vulnerable households with cash transfers. Alongside these activities, our teams referred protection and malnutrition cases to appropriate support services. SOLIDARITÉS INTERNATIONAL's programmes also improved access to water, sanitation and hygiene: our teams rehabilitated 24 boreholes, built 2 blocks of latrines and carried out hygiene awareness activities with 7,614 people.

ESSENTIAL, LARGE-SCALE AID

In 2024, SOLIDARITÉS INTERNATIONAL provided assistance for 4,382,835 people in 26 countries around the world. Syria received the most support, with 641,727 beneficiaries, followed by the Democratic Republic of Congo where we helped 618,818 people, then Sudan where 524,727 people received assistance. Next came Yemen (362,520 people), South Sudan (327,684 people) and Burkina Faso (204,711 people).

AN URGENT SITUATION FOR DISPLACED PEOPLE IN HAITI

Haiti is facing an unprecedented humanitarian crisis, with rising insecurity and increasingly limited access to people that need assistance. Vulnerability indicators are at alarming levels throughout the country. The situation is critical in Port-au-Prince, where organized criminal groups control a large portion of the capital city, leaving thousands of internally displaced people with vastly reduced access to basic services. In response to this crisis, SOLIDARITÉS INTERNATIONAL has implemented emergency activities, such as supplying water via tanker truck, improving access to nutrition for households and in schools, and reinforcing water, sanitation and hygiene services in camps for displaced people, in coordination with health and protection actors.

THE SUDANESE POPULATION IN THE GRIP OF ALL-OUT WAR

Since 15 April 2023, Sudan has been ravaged by armed conflict between the Sudanese Armed Forces (SAF) and the Rapid Support Forces (RSF). Fighting broke out in Khartoum, then spread to Darfur and Al Jazeera State in December 2023. This has caused an unprecedented humanitarian crisis: 10.4 million internally displaced people and 30 million people in need of assistance. SOLIDARITÉS INTERNATIONAL, which was the first international NGO to return to Darfur following the evacuation of our teams, reacted to this emergency with a multi-sectoral response: distribution of kits, cash transfers, rehabilitation of water systems, construction of latrines and shelters, waste management, food support, water access, livelihoods support and community resilience.

ETHIOPIA: UNDER PRESSURE FROM MULTIPLE VULNERABILITY FACTORS

SOLIDARITÉS INTERNATIONAL's teams continued to provide support for vulnerable populations in Ethiopia during 2024, in response to the multiple crises affecting the country: the impact of the Sudan war, recurrent internal tensions, floods and droughts caused by climate change, significant seismic activity, epidemics.

In the Benishangul Gumuz region, 10 water points were rehabilitated in difficult-to-access rural areas, benefiting 17,915 local residents, with support from local groups: Development Associations Network and Mao Komo Development Association.

Although the war in Tigray has ended, the areas bordering Eritrea are still partially occupied. These areas are suffering from high levels of food insecurity and malnutrition. In September, SOLIDARITÉS INTERNATIONAL's teams launched a project with the NGO Mum For Mum, which aims to provide 40,000 people with multi-sectoral support (water, hygiene, sanitation and nutrition). A second project plans to support ex-combatants, war widows and community members affected by the war by providing them with professional training and cash-based assistance to help them resume professional activities. This project includes a health component, implemented by Médecins du Monde, and a "peace-building" component, for which the Ethiopian Institute for Peace is responsible.

DRC: ADAPTING TO A SEVERE, SHIFTING CRISIS

The Democratic Republic of Congo is currently enduring one of the most severe humanitarian crises in the world. In 2024, 25.6 million people were suffering from acute food insecurity and over 7 million people were displaced, mostly in the east of the country. Fighting, extreme violence, epidemics and climate change have further exacerbated the situation. In response, SOLIDARITÉS INTERNATIONAL provided emergency assistance (water, hygiene, food, shelter), mainly around Goma, despite the prevailing insecurity. Our NGO adapted its operations to successive population displacements and worked on both sides of the front lines, in partnership with local organizations. We also supported agricultural recovery, community resilience and continued our advocacy for appropriate funding mechanisms.

AFGHANISTAN PLAGUED BY CLIMATE CRISIS AND DISCRIMINATION

In 2024, 23.7 million Afghans were in need of humanitarian aid, 17 million of whom required priority assistance. Since the country is dependent on agriculture, the climate crisis has weakened the already fragile economy, reducing access to essential services, including healthcare. Human rights, and especially women's rights, have continued to regress. In response to this situation, SOLIDARITÉS INTERNATIONAL took action to support food security, agricultural livelihoods, water, hygiene and sanitation, as well as to reduce climate risks. With support from our funding partners, our NGO consolidated its emergency response, expanded its operations, opened a base in Farah and formed new local partnerships. We are currently rethinking the role of women in our water, sanitation and hygiene activities, with a view to initiating innovative projects in 2025.

2024 PARTNERS' FORUM

INNOVATING TO SUPPORT BENEFICIARY POPULATIONS

On Thursday 30 June 2024, SOLIDARITÉS INTERNATIONAL held its Partners' Forum at the NGO's head office. In line with our commitment to provide expert humanitarian assistance that is centred on the needs of crisis-affected populations, the Forum focused on innovation and brought together around thirty private and institutional partners.

During the event, the participants tested Solisbot, a chatbot assistant created by SOLIDARITÉS INTERNATIONAL, which provides our beneficiaries with a hotline to serve their vital needs. Our partners, such as Orange, RedRose and HCR, also shared their experience and feedback, with examples of how digital tools can improve access to aid, empower people affected by crises and increase the impact of humanitarian action

OUR DYNAMIC REGIONAL DELEGATIONS

During the summer of 2024, our three regional delegations once again actively participated in the season's key events. Drawing on their previous experience, the Brittany delegation took part in the *Inter-Celtic Festival* in Lorient for the fourth time, where they were present for seven consecutive days. The Pays de la Loire delegation also maintained their famous hat-trick of three festivals on three consecutive weekends: *Rendez-vous de l'Erdre*, *Folie des plantes* (Nantes) and *Accroche-Cœurs* (Angers). Finally, volunteers from the Ile-de-France delegation took part in the *Solidays* festival at Longchamp Racecourse, as well as the Associations' Forum in Clichy and the "Course de la Diversité" charity run in Vincennes. So it was a busy summer for our 50 volunteers, who represented SOLIDARITÉS INTERNATIONAL at all these events and shared our messages with the general public. Their aim: to raise awareness, increase our visibility and encourage people to get involved!

AN *AWARD* FOR SOLIDARITÉS INTERNATIONAL

We are proud to announce that SOLIDARITÉS INTERNATIONAL has won the ".ORG Impact Award 2024", from among 1,700 candidate organizations. This prize is awarded every year in Washington by the Public Interest Registry in recognition of the positive impact made by an organization. SOLIDARITÉS INTERNATIONAL won the 2024 award in the "Hunger and Poverty" category, for our work in 25 countries facing severe humanitarian crises. Our organization provided support for around 5 million people in 2023, by implementing human-centred solutions adapted to local needs and environments. This award celebrates the commitment of our teams, who ensure that our NGO fulfils its mandate. The prize is an encouragement to continue their work and highlights their expertise and their role in global humanitarian action.

RAISING AWARENESS WITH PHOTOS

Our NGO produced three photo exhibitions in 2024. The first one, which was displayed during our event for public and private partners, focused on Sudanese refugees in Chad. The second was devoted to Syria and comprised a series of portraits linked to each person's video testimonial, which could be viewed online. This exhibition was shown at La Bellevilloise in Paris for two months, and the closing event was attended by 80 people. Finally, the third exhibition highlighted the forgotten crisis in the Democratic Republic of Congo and was presented during the European Humanitarian Forum in Brussels.

MEETING THE HUMANITARIAN CHALLENGES OF OUR TIME, TOGETHER

In response to increasingly complex, interconnected humanitarian crises, SOLIDARITÉS INTERNATIONAL consolidated its activities in 2024, thanks to growing, valuable support from our private partners and donors. Their decision to support our work shows their strong, steadfast commitment to work together to build a more inclusive, resilient world where everyone can live in dignity. Working in synergy enables us to join forces and combine our resources and expertise to invent new solutions. These solutions always seek to serve the common good, with the unshakeable goal of effectively meeting the needs of the worst-affected populations during crises.

With escalating conflicts around the world, a growing number of natural disasters and increasing pressure on public funding, SOLIDARITÉS INTERNATIONAL has consolidated and diversified its private sector resources. We are convinced that we must find collective, sustainable, innovative solutions to meet current humanitarian challenges. Our NGO has therefore taken active measures to strengthen our strategic alliances. These partnerships not only allow us to take action more quickly, with greater operational flexibility, but also enable us to jointly advocate for the fundamental human rights of the most vulnerable populations.

UNPRECEDENTED SUPPORT FROM OUR DONORS AND PARTNERS

The support we received from individual donors in 2024 was exceptional. Their generous donations in response to major humanitarian emergencies - Gaza, Lebanon, Mayotte - enabled us to react quickly to critical situations. Regular direct-debit donations grew significantly, increasing our NGO's independence and boosting our capacity to build sustainable activities. Bequests and gifts, which allow our donors to "leave a lasting legacy", are also on the rise, reflecting their profound trust in our enduring action and rigorous management.

A growing number of companies, foundations and institutions have joined us as partners or renewed their partnerships with us. Their support takes various forms: financial contributions, skills sponsorships, in-kind donations, employee fundraising, or joint awareness campaigns. Companies from a wide range of sectors - food, energy, technology, logistics, healthcare - have joined forces to boost the impact of our humanitarian programmes, in particular in Sudan, Syria, Haiti and Ukraine. This multi-faceted support gives us essential leverage to meet humanitarian challenges today and in the future.

SHARED VALUES TO SERVE THE COMMON GOOD

SOLIDARITÉS INTERNATIONAL and our partners and donors are united by a shared vision: to actively provide practical support, based on strong human-centred values. Our partnerships are rooted in responsibility, mutual respect, transparency, efficacy and two-way learning. Through constant dialogue, shared impact reports and by building long-term, trust-based relationships, every partnership truly contributes to making progress.

Our aim is to develop and extend this approach, because SOLIDARITÉS INTERNATIONAL considers these companies and individual donors as much more than sources of funding. We view them as partners, who are both committed to change and fully aware of the humanitarian and environmental challenges faced by society. They work with us to defend a certain conception of human dignity.

BUILDING SUSTAINABLE, FAR-REACHING HUMANITARIAN ACTION TOGETHER

Together, we are demonstrating that humanitarian organizations and private entities can build powerful, meaningful, long-term partnerships. By standing together, we are proof that every part of society can and must play a part in supporting those in need. It is these interactions between citizens, businesses and NGOs that will enable us to meet the challenges of our time, and offer populations in distress genuine, decent, sustainable prospects.

We extend our sincere thanks to everyone who chose to support our work in 2024. Their commitment, loyalty and high standards enabled us to implement humanitarian programmes to meet the needs of the most vulnerable populations, and to do so with rigour, professionalism and humanity. Their support is an essential source of stability, innovation and legitimacy for our action. It encourages us to keep up our efforts, extend our reach and uphold our principles.

The commitment of our donors and partners is a valuable beacon as we face an uncertain future, when NGOs will be called upon to provide humanitarian assistance even faster, to take aid further and to sometimes work in extreme conditions. Their humanity makes all the difference when others are tempted to turn away or remain indifferent. Now and in the future, our commitment is fuelled, first and foremost, by their commitment.

20 YEARS ON, RAPID RESPONSE MECHANISMS FOR DISPLACED POPULATIONS ARE MORE ESSENTIAL THAN EVER

In 2023, the number of people uprooted by persecution, conflict and human rights violations around the world reached a record high of 117.3 million.[1] Behind these unprecedented figures are the increasingly complex dynamics of population movements, to which humanitarian organizations like SOLIDARITÉS INTERNATIONAL must continuously adapt.

TAKING ACTION QUICKLY: A HUMANITARIAN IMPERATIVE

Armed conflict remains a major cause for displacement. Most displaced people flee their home areas because hostilities pose a threat to their own security and survival or that of their family.

Extreme weather events, compounded by climate change, such as floods and droughts, also have a profound impact on population displacements in vulnerable regions.

Many countries are suffering from a combination of these factors. Since 2009,[2] the number of countries that reported population displacements due to armed conflict or natural disasters has tripled.

Providing a rapid, appropriate response to these people's needs requires coordinated, responsive solutions that can be rapidly deployed in complex contexts, and that are mobile to follow people as they move.

SOLIDARITÉS INTERNATIONAL has been implementing rapid response mechanisms (RRM) for 20 years. RRMs rely on coordination between humanitarian actors to preposition equipment, use predefined criteria to identify needs, and deploy trained teams to deliver appropriate assistance. This provides a clear framework for the humanitarian response in the first few days following a shock.

In 2024, over 1.2 million people benefited from one of the rapid response mechanism projects led by SOLIDARITÉS INTERNATIONAL and our partners.

EXPORTING AND ADAPTING THE SOLUTION TO NEW CONTEXTS

Over the last two decades, the mechanisms created in the Democratic Republic of Congo have been extended to cover other countries. The operating methods and parameters of RRM projects have been adapted to fit these new contexts, and now also integrate the humanitarian sector's commitments to improve the effectiveness and efficacy of humanitarian action. Today, our teams work with local partners as early as possible to implement rapid responses. This is the case in Haiti, where our local partner is running psychosocial support units in community spaces close to sites for displaced people. In Yemen, the assistance provided involves cash transfers to enable beneficiaries to use this money according to their specific needs.

Since the number of conflicts and climate hazards worldwide is unlikely to decrease, we will have to continually reinvent our responses to the vital needs of displaced people. Our teams will continue to stand by those in need, providing appropriate aid and ensuring their dignity, using our approach to prevent, accompany and respond to population displacements.

ARMED CONFLICT AND FORCED DISPLACEMENT
OUR 2024 CAMPAIGN

In 2024, our annual campaign focused on the forced displacement of populations during armed conflict. The aim was to challenge false perceptions by presenting a human-centred, sensitive perspective on the experiences of displaced people. The campaign was displayed throughout France on billboards in the public transport network, car parks and shopping centres, from 10 June to 7 July, then from 24 October to 14 November 2024. Campaign messages were also published in the press and on social media, and a video was co-produced with BRUT, a French online media channel, which was viewed around 800,000 times.

TALK HUMANITAIRE: FORCED DISPLACEMENT, REBUILDING LIVES

The third edition of our *Talk Humanitaire* was a resounding success. It was held in Bayeux on 12 October 2024, during the Bayeux Calvados-Normandy Awards for War Correspondents. This year, the event focused on broken lives due to forced displacement in conflict zones. The following panellists participated in the round-table discussion:

- Paolo Artini, the French representative for the UN Refugee Agency;
- Justine Muzik Piquemal, regional director for SOLIDARITÉS INTERNATIONAL;
- Rosa Al Juhmany, engineer, Syrian refugee, and laureate of the UNHCR Academy for the Participation of Refugees;
- Caroline Bouvard, Sudan country director for SOLIDARITÉS INTERNATIONAL, who hosted the discussions.

Over 200 people came to listen to the panellists and talk to our team members who were on hand to answer questions.

ADVOCATING FOR HUMANITARIAN ACCESS AND FUNDING

In 2024, we stepped up our advocacy and influencing efforts for the humanitarian system to respond rapidly, effectively and with dignity to the needs of crisis-affected people, wherever they may be.

For example, the CEO of SOLIDARITÉS INTERNATIONAL acted as spokesperson for civil society at the International Humanitarian Conference for Sudan and Neighbouring Countries, which was held in Paris on 15 April 2024. During the conference, he urged decision-makers to take further diplomatic action to guarantee humanitarian access, and to mobilize additional funding to alleviate the suffering of the population living in the region. Access and funding are also the central themes of our field teams' continuous advocacy, all year round.

In Gaza, where our teams witness the suffering and daily perils endured by the civilian population, we took part in collective advocacy efforts with other humanitarian actors to call for a permanent ceasefire, unfettered humanitarian access, neutral and impartial aid distributions and compliance with international humanitarian law to protect civilians - including humanitarian workers - and essential infrastructure. We also contributed to "Access snapshots", an essential UN monitoring tool to document the difficulties encountered when transporting humanitarian aid to the Gaza Strip.

Our advocacy also targeted the alarming cuts in humanitarian funding over the last few years. For example, we supported Coordination SUD's efforts to maintain the official development assistance budget in the French Budget Bill.

On a broader scale, advocacy is an integral part of our teams' daily activities in the countries where we work. They tirelessly call on humanitarian coordinators, institutional donors and public authorities to facilitate the rapid, effective delivery of neutral, impartial assistance to populations in need, even in the most isolated and difficult-to-access areas. And they are determined to be heard!

OUR CONSTANT COMMITMENT TO FAIR, ETHICAL HUMANITARIAN ACTION

In line with our organization's ethical framework, in 2024 we maintained our commitment to prevent, detect and address any form of abusive behaviour committed by our team members or stakeholders.

WE HAVE ESTABLISHED ACCESSIBLE, SECURE, CONFIDENTIAL MECHANISMS FOR:

- populations affected by crises. Complaints and Feedback Management Mechanisms (CFMM) are systematically implemented, in consultation with local populations, to enable them to report any complaints, questions or comments.
  These accountability mechanisms are used to continuously improve programme quality, as well as to combat any form of abusive behaviour.

- all of our internal staff and stakeholders, to enable them to report any situations that breach our NGO's Code of Ethics and Conduct.

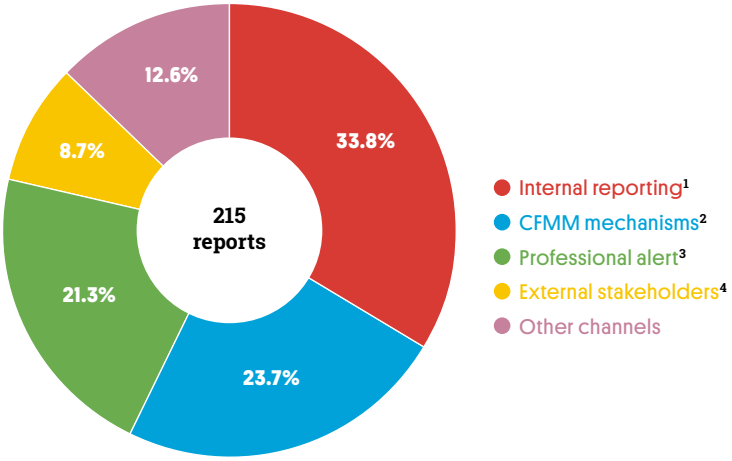
In 2024, we received 215 alerts. 50% of these reports resulted in a detailed internal investigation, 10% were resolved following preliminary checks and 40% were addressed using alternative resolution mechanisms.

TYPES OF ALERT RECEIVED:

- 40% of the reports involved allegations of fraud or corruption. 30% of these claims have now been substantiated and disciplinary measures have been taken against the people involved. In some cases, this resulted in the termination of their contract.

- 19% of the reports involved allegations of sexual exploitation, abuse or harassment (SEAH). 40% of these claims have now been substantiated, and our contracts with those involved have been terminated.

REPORTS SUBMITTED BY CHANNEL



1 **Reports submitted by internal staff via SOLIDARITÉS INTERNATIONAL's secure professional alert line.**

2 **Complaints registered by populations receiving support via complaints and feedback management mechanisms.**

3 **Reports received via our internal audit mechanisms or communicated by line managers in our country offices or head office.**

4 **Complaints submitted by stakeholders in our operations: implementation partners, suppliers, institutional donors, etc.**

FOCUS ON 2024 ACCOUNTS

TREASURER'S REPORT

With 24 country offices as of 31 December 2024, the NGO's volume of activity in 2024 stood at €173.3M, a 9% decrease compared to 2023.

Expenditure on humanitarian aid can be broken down as follows: humanitarian aid expenses in the field (including voluntary contributions in kind), which stood at €152.5M in 2024 (compared to €170.3M in 2023); operational support expenses at head office, which amounted to €8.7M in 2024 (compared to €7.9M in 2023); and finally, public awareness and advocacy activities which stood at €337K in 2024 (compared to €248K in 2023).

For the first time, Yemen became our largest field mission, with an operating volume of €18.7M, a 27% increase compared to 2023. In Syria, the volume of activity dropped by 36% to €17.2M. The DRC remained in third place, despite a 10% decrease in operating volume to €16.1M this year, and Ukraine came fourth with €13.8M (-39%). The humanitarian crisis in Sudan since April 2023 still accounts for a large proportion of our activities: the volume of aid provided rose between 2023 and 2024 in Sudan (+137%), South Sudan (+9%) and Chad (+38%). Our activities in the Gulf of Guinea, which were launched in 2023, also grew to €1.6M in 2024.

Two country offices were opened in 2024, in Ethiopia and Gaza, and we responded to a major emergency in Mayotte in December 2024, from our existing operations there. In Ethiopia, SOLIDARITÉS INTERNATIONAL's teams took action in the Tigray region, to assist widows and bereaved families following the bloody civil war the previous year. Our teams also carried out water, sanitation and hygiene activities, distributed monetary resources to the most vulnerable people, and referred individuals suffering from nutrition or requiring protection to appropriate organizations. Our NGO started working in Gaza in February 2024, where we focused on producing and distributing drinking water.

Two country offices were closed: Pakistan (July 2024), where our teams had been working since the floods in 2022; and Morocco (February 2024), once post-crisis activities after the September 2023 earthquake had been completed, to provide safe access to drinking water and sanitary facilities for affected populations and protect their dignity.

Donations from the general public rose to €5.8M in 2024 (a 1.56% increase compared to 2023). To make donations from the general public more visible in the Statement of Sources and Application of Funds, in 2024 we added a new line called "Sponsorship" to the "Fundraising from the General Public" sub-section, to specify the funds received from companies, foundations and other private donors. This allows us to distinguish these funds from the subsidies obtained via partners within consortiums which remain in the "Non-exchange Financial Contributions" line.

Fundraising expenses decreased by 7% between 2023 and 2024 (including voluntary contributions in kind), mainly as a result of less frequent campaigns to recruit new direct-debit donors. Operating expenses fell by 3%, however this can be explained by the positive impact of exchange rates. Exchange rates aside, operating expenses remained stable compared to 2023, at €3.1M.

This year, the fluctuation of the Euro against the US dollar and UK sterling yielded exchange rate gains of €1.5M, compared to losses of €2.6M in 2023. These gains were mainly achieved by optimizing banking routes for transfers from head office to country offices to reduce multiple currency conversions.
The operating result for the 2024 financial year was a surplus of €4,006,329. The allocation of this amount will impact the balance carried forward in the liabilities section of our Balance Sheet. On 31 December 2024, the organization's capital reserves stood at €16,378,806.

Approved during the Annual General Meeting on 21 June 2025

By Amanda Lovell,
Treasurer

RIGOUR AND TRANSPARENCY

SOLIDARITÉS INTERNATIONAL has an internal ethics and audit department that reports directly to the CEO, as well as to our organization's Ethics and Audit & Risks committees. Through the implementation of an annual internal audit plan, this department evaluates the compliance of our organization's processes, transactions and decisions, to enable greater risk control and constant improvements in organizational practices. In 2024, six internal audits were carried out in the field and one audit was conducted on head office processes. Six of SOLIDARITÉS INTERNATIONAL's missions and two regions also had their own Compliance and Ethics teams in 2024, who made sure that internal audits of these countries' activities were carried out regularly. In addition, SOLIDARITÉS INTERNATIONAL managed 98 external audits of our projects in 2024, representing over €103 million in audited funding contracts. We regularly evaluate our humanitarian activities to improve efficiency and increase their impact.
